Regulation aspects of plasma supply for production of medicinal product - plasma derivatives

Issues of quality assurance

Vera Bogdanova. "Russian medical scientific and production center “Rosplasma” of Federal Medical-Biological Agency of Russian Federation
Advisor to the Director General.
The specific production:
Collection of biological materials from human
Each plasma unit is a separate series

Lead to obvious limitations of blood and blood components quality control

Requires of quality assurance at all stages from medical assessment of the donor to delivery of finished products

Management tool: quality system
